

TETRA PAK MATERIALS, L.P.
FORT WAYNE, INDIANA

The Tetra Pak Materials, L.P. facility, of Fort Wayne, Indiana, is part of Tetra Pak, Inc. and manufactures packaging material for food packaging applications. The facility is certified in both ISO9002 and ISO14001.

ENVIRONMENTAL PERFORMANCE

Past Accomplishments

The Tetra Pak Materials, L.P. facility has demonstrated its commitment to environmental performance through reduced solid waste and packaging material. Since 1999 the facility has:

- **Reduced solid waste** taken to the landfill by 58% through increased recycling, improving operational controls and also through working with suppliers to ensure that less waste comes into the facility.
- **Reduced packaging material** 9% by creating an improvement team, which then worked with suppliers to create a better product, thus reducing waste.

Future Commitments

Tetra Pak Materials, L.P. is working to reduce energy use, water use and total solid waste. By 2004 the facility will:

- **Reduce energy use** 27% by overall improved awareness among the employees of ways to better conserve energy. Examples include simply turning out lights to installing energy saving devices.
- **Reduce water use** 27% by implementing conservation methods, such as reduced irrigation and repairing water faucets.
- **Reduce energy use** 27% through better control of production. Two examples include turning down the water heaters to lower gas used and also keeping more consistent heating.
- **Reduce total solid waste** 43% through increasing recycling across the plant, thus

AT A GLANCE:

Industry Sector:	SIC 2656
Business:	Manufactures packaging material for food
